

WHY HOURLDOC?

TIME TRACKING, SCHEDULING, PAYROLL REPORTING.

HourDoc.com is web-based, eliminating the need for costly investments in unnecessary hardware, maintenance fees or hiring the specialized service of support professionals.

DIRECT EXPORT TO HEARTLAND PAYROLL SERVICES.

With a few quick clicks of the mouse, HourDoc imports payroll information directly to Heartland Payroll Services, thus freeing managers up so they can focus on more pressing issues.

HOURLDOC SAVES BOTH TIME AND MONEY.

Why settle for time consuming “web based” solutions requiring you to log on their site to input employee payroll information on a web-based timesheet?

BE UP AND RUNNING EASILY WITHIN A FEW DAYS.

Once an employee’s basic set-up data has been imported and they have been assigned user names and passwords, employees are ready to start tracking time into the secure and reliable HourDoc system. (No Social Security numbers required.)

NO UPGRADES TO BUY OR INSTALL.

HourDoc is continually maintained and upgraded, with new innovative features added and existing features enhanced without interrupting service or charging additional fees.

SIMPLE TO USE, EVEN FOR THE LEAST COMPUTER SAVVY USER.

HourDoc’s intuitive user interface makes formal training almost unnecessary, helping every employee understand the system and begin utilizing its time saving features.

ACCESSIBLE FROM ANYWHERE.

When given authorization, employees can work from home, a branch office location or at any computer with Internet access. They can also use both MAC and PC operating systems, giving your company the flexibility our competitors simply cannot provide.

CUSTOMIZED SOLUTIONS TO YOUR NEEDS.

Can HourDoc be fine-tuned to fit your organization? It sure can! Our programmers can enhance HourDoc to fit your specific requirements with minor fees depending on the request and often at no cost to your organization.

HOURLDOC GROWS WITH YOU.

Start out small and save money as your business grows while receiving the most updated features without incurring additional hardware or software development costs.

RELIABLE, SAFE AND SECURE.

With 128 Bit encryption and offsite server backups, your data is more secure than an unsecured desktop in the office.
